Please take note of the following crucial points: 1) Verify Patient Eligibility and Provider Participation Status: Prior to providing any services, we strongly recommend checking the patient's eligibility and the provider's participation status with the insurance plan in question. Additionally, please review the fee schedule applicable to a specific patient's plan. 2) Notification of Out-of-Network Status: If, during your interactions with the insurance representative, you are informed that you are out of network or that a different fee schedule applies, we kindly request that you notify us before delivering services to the patient. This proactive communication allows us to promptly address the matter with the insurance provider. 3) Shared Network Relationships: It's important to recognize that there may be overlapping shared network relationships. In such cases, it is vital to ensure that you are compensated according to the planned fee structure. To confirm that there are no deviations from this structure, we encourage you to verify the fee structure for each patient's insurance before rendering services and finally check if your Explanation of Benefits (EOB) reflects the same payment fee structures. 4) Indirect Participation Through Umbrella Networks: If you have opted to participate indirectly with an insurance plan through an umbrella network, please be aware that many of the plans do not have 100% participation through umbrella networks. There may be certain groups that are out of network. Therefore, it is of utmost importance to consistently check eligibility and understand the specifics of your participation arrangement. These proactive steps will help ensure a smoother process for both providers and patients, minimizing any potential billing or reimbursement issues. If you have any questions or require further guidance on these matters, please do not hesitate to reach out to us. Your diligence in checking eligibility and understanding fee structures is greatly appreciated.
